

SuperCyc 2.4

Body

- manufactured from aluminium and stainless steel sheet, black paint
- 2 G22 lamp bases
- forced convection ventilation and heat dissipation system
- IP20 protection rating
- base and yoke locks for ease of transportation
- 4-leaf barndoors
- meets CE norms

Lamps available

- 2 x 1200 MSD Philips
- 2 x 1200 MSR Philips

Optics

- patented dual lamp system

- 2 "cold type" heat dissipating glass reflectors with quartzed dichroic (infrared) finish
- lamp adjustment in the optical system
- very high luminous intensity with maximum use of the light obtained from the 2 parabolic reflectors with axial mounted MSR/MSD 1200W

Beam dispersion devices

- variable size rectangular beam
- 4 different interchangeable diffusion filters give different beam angles: 2 types of symmetrical, horizontal and vertical
- 4 leaf-barndoors to shape the beam at desired size

Movement

- articulated movement of the projector body: pan 425°, tilt 212°
- 16 bit light beam positioning

Dimmer

- built-in mechanical electronically controlled dimmer, for complete adjustment of light output from 0 to 100%

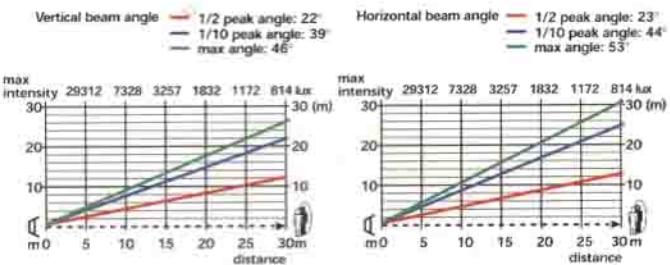

Colour

- infinite colour output via CMY colour mixing system
- consistent colour reproduction due to unique dichroic filter design and by virtue of simultaneous movement of the filters

Lamps supply

- 2 voltage stabilised electronic ballasts
- PFC (power factor corrector)
- not effected by power and frequency fluctuation (self-stabilising)
- flicker free ballasts
- automatic lamp power reduction when in black-out position

Beam shape: rectangular Medium diffusion filter

Hardware devices

- control by DMX 512 standard signal via 3 and 5 pin XLR
- thermal magnetic protection
- micro-step driven stepper motors
- led display
- over temperature protection
- 4 menu/function buttons for selecting the operation mode
- ultra-flexible torsion cables conductors
- on/off of the two lamps
- independently controllable via DMX

Software devices

- DMX signal reception indicator and characteristic feature display
- addressing via multifunction display panel
- ventilation regulated by an internal timer (activated depending on lamp status)
- built-in test facility features
- display can be inverted
- reversal of pan and tilt movement
- micro-step driven stepper motors
- lamp on/off ability without pan/tilt movement
- electronic log to indicate lamp and fixture working life

Patents

- Supercyc 2.4 is protected by international patents.
- Partial or complete reproduction of the unit is forbidden

Exclusive technology

Coemar's patented Twin Lamp Technology (TLT) is a unique system which uses a twin lamp and optical system to dramatically increase luminous output whilst minimising power consumption.

Formidable output

The luminous output developed far exceeds that of mono-lamp technology; the TLT system does not sum the intensity of its lamps, but multiplies it.

One Or Two Lamps - choose between power and energy savings

It is possible to control one lamp or the other independently although most users will opt for the full power of twin lamps. The color and spread are the same using one lamp or two so the option is yours.

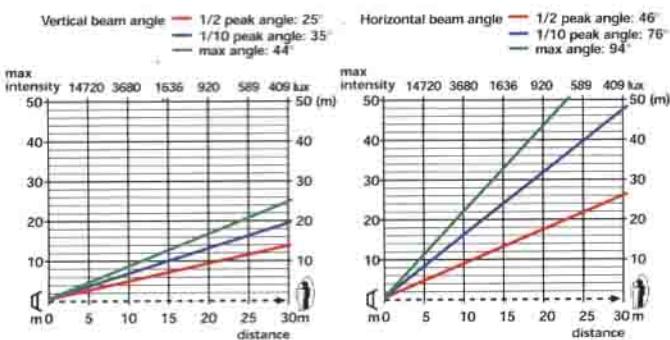

Maximum efficiency or maximum lamp life?

TLT allows the use of both MSR (maximum output) and MSD (long life) lamps at will, further enhancing the flexibility and superiority of the system.

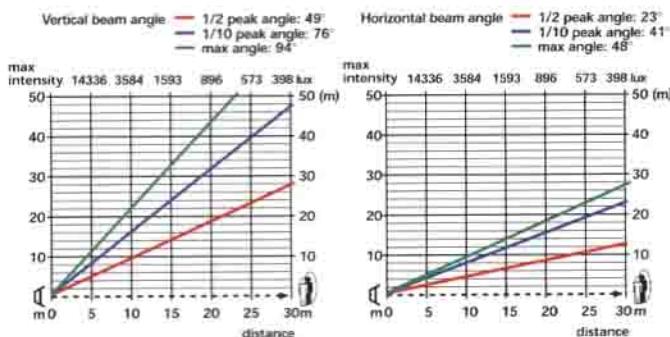

Framing output at will

The TLT optical system utilises additional glass filters allowing maximum and precise control of the beam providing the designer with the ability to accurately frame their subject.

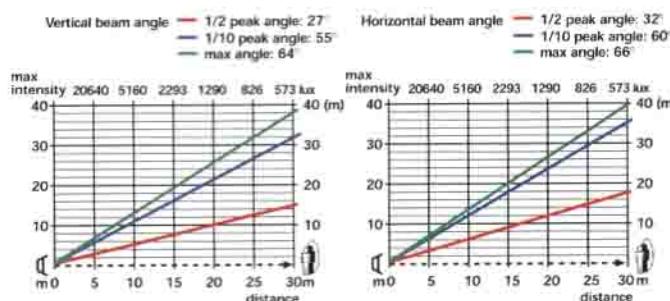

Beam shape: rectangular Horizontal Diffusion Filter

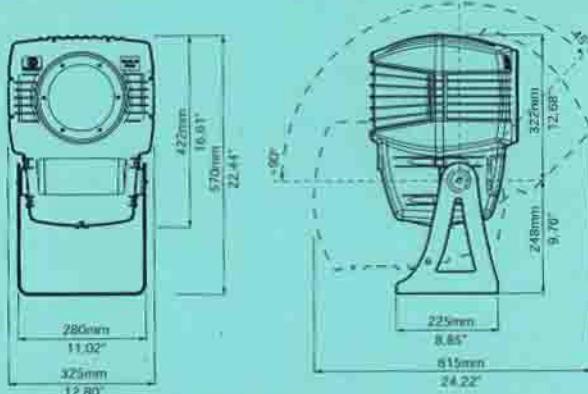

Beam shape: rectangular Vertical Diffusion Filter

Beam shape: rectangular Soft Diffusion Filter

250 Panorama Cyc

Body

- manufactured from aluminium, stainless steel sheet and waterproofed iron
- painted components are padded with weather protection, high resistance matt black polyester paint
- self-extinguish, fire-retardant and weather protection class V0 ABS material cover, with 20% glass fiber
- GY 9.5 lamp base

► IP44 protection rating. Suitable for outdoor use

- graduate position indicator
- meets standards CE

Lamps available

- 250W/2 MSD Philips
- 250W MSD Philips

Ventilation

- silent forced ventilation
- self adjustment of cooling fan speed according to lamp status
- ventilation feedback allows automatic switching off of the lamp in case of malfunctions

Optics

- elliptical multi-facet borosilicate aluminium coated reflector

Beam shaping device

- 4 interchangeable prismatic lenses to obtain different projection angles and beam shapes
- the 4 diffusion and shaping lenses are rotatable on their own axes to obtain light projection on 360°

Dimmer

- built-in mechanical electronically controlled dimmer for complete adjustment of light output from 0 to 100%

Colour

- infinite colour output via CMY colour mixing system
- consistent colour reproduction due to unique dichroic filter design

Automated functions

- nine internal colour changing crossfade programs with user definable variable rate
- it can operate in the absence of a controller
- synchronised master/slave ability
- able to operate the internal programs and their parameters via 6 channels of DMX 512

Hardware devices

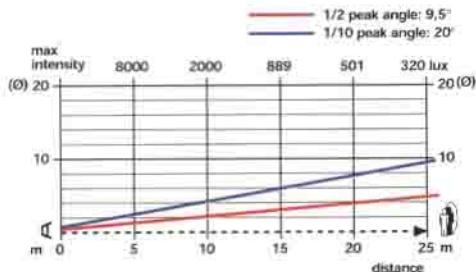

- DMX signal reception indicator and characteristic feature display
- control by DMX 512 standard signal via 3 pin XLR, signal connectors are IP67 rated
- built-in electro-magnetic ballast, ignitor and power factor corrections
- micro-step driven stepper motors
- 4 menu/function buttons for selecting the operation mode
- led display
- over temperature protection

Software devices

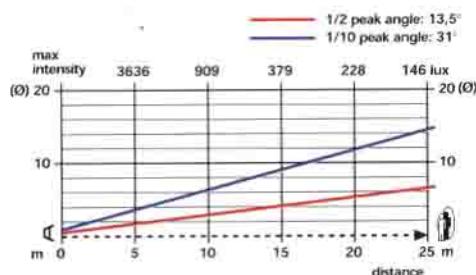

- dmx numeric addressing via multifunction display
- on/off display
- indication of the lamp and the fixture working life
- display can be inverted
- electronic motor calibration
- lamp on/off via digital signal with ability to disable
- built-in features test facility
- automatic test menu
- individual control of motors function even without DMX signal
- position of motors can be recorded during switching on of the unit
- software version indication
- unit is set for remote display reading

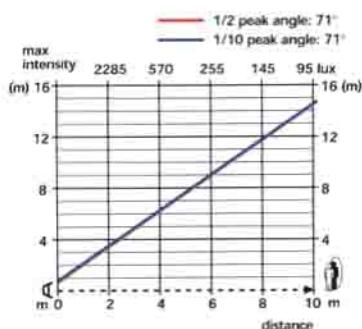

Beam shape: round
Soft diffusion lens (code VT 171/3)

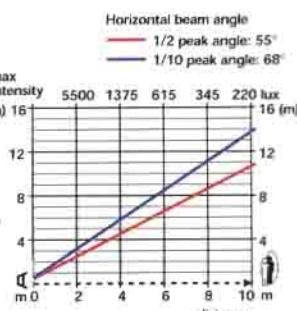

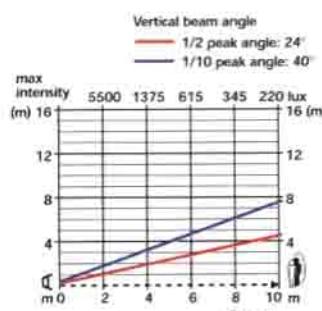

Beam shape: round
Medium diffusion lens (code VT171/1)

Beam shape: square
Max diffusion lens (code VT 171/2)

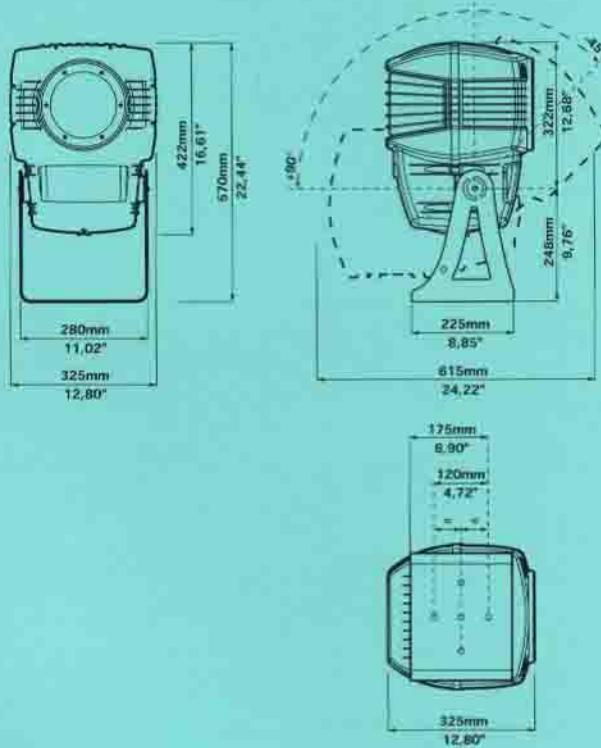

Beam shape: rectangular
Shaping lens (code VT 171)

250 Panorama Cyc

C.

Body

- manufactured from aluminium, stainless steel sheet and water proofed iron
- painted components are padded with weather protection, high resistance matt black polyester paint
- self-extinguish, fire-retardant and weather protection class V0 ABS material cover, with 20% glass fiber
- GY 9.5 lamp base

► IP44 protection rating. Suitable for outdoor use

- graduate position indicator
- meets standards CE

Lamps available

- 250W/2 MSD Philips
- 250W MSD Philips

Ventilation

- silent forced ventilation
- self adjustment of cooling fan speed according to lamp status
- ventilation feedback allows automatic switching off of the lamp in case of malfunctions

Optics

- elliptical multi-facet borosilicate aluminium coated reflector

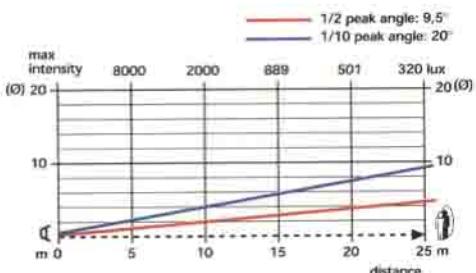

Beam shaping device

- 4 interchangeable prismatic lenses to obtain different projection angles and beam shapes
- the 4 diffusion and shaping lenses are rotatable on their own axes to obtain light projection on 360°

Colour

- 4 dichroic colours + "white"
- adjustable speed rainbow effect
- step or proportional colour positioning in respect of the optical axis

Beam shape: round
Soft diffusion lens (code VT 171/3)

Automated functions

- internal automatic programs
- it can operate in the absence of a controller
- synchronised master/slave ability
- able to operate the internal programs and their parameters via DMX 512

Hardware devices

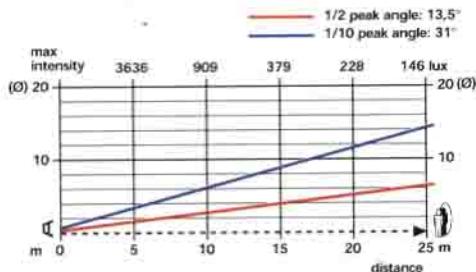

- DMX signal reception indicator and fans functioning indicator
- control by DMX 512 standard signal via 3 pin XLR; signal connectors are IP 67 protection rated
- built-in electro-magnetic ballast, ignitor and power factor corrections
- micro-step driven stepper motors
- dip-switches for function mode selection
- over temperature protection

Software devices

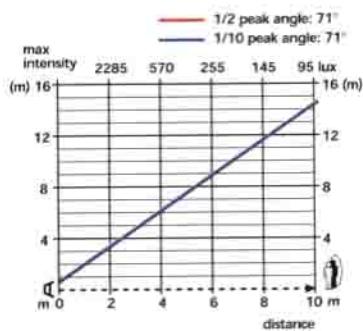

- dmx numeric addressing via dip-switches
- electronic motor calibration
- lamp on/off via digital signal with ability to disable
- built-in features test facility
- unit is set for remote display reading

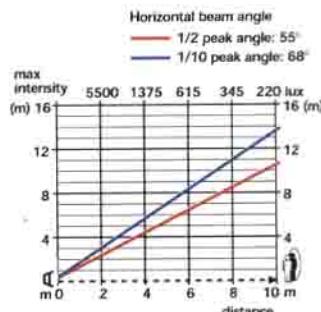

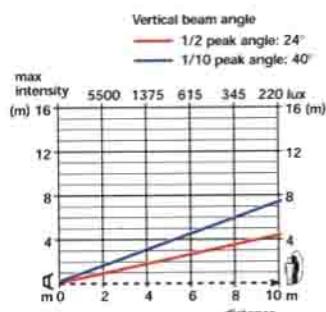

Beam shape: round
Medium diffusion lens (code VT171/1)

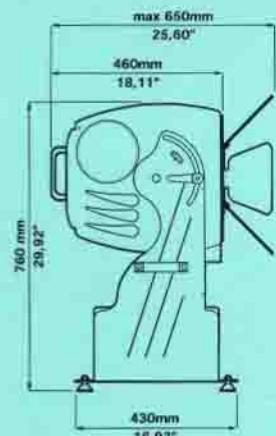

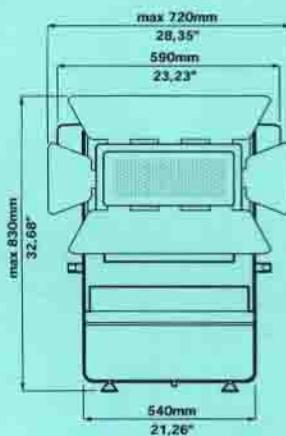

Beam shape: square

Beam shape: rectangular
Shaping lens (code VT 171)

Panorama Cyc Power

Body

- manufactured from aluminium and stainless steel sheet
- weather protection, high resistance matt black polyester paint
- 2 x GX 9.5 lamp bases
- forced convection ventilation and heat dissipation system

► IP44 protection rating, suitable for outdoor use

- adjustable tilt positioning
- graduated position indicator
- 4 leaf barndoors
- wire guard for diffusion filter
- easy maintained, insect protection filters
- 4 rubber feet for floor positioning
- meets standards CE

Lamps available

- 2 x 575 MSD Philips
- 2 x 575 MSR/2 Philips

Optics

-  patented dual lamp system

- 2 x "cold type" heat dissipating glass reflectors with quartzed dichroic (infrared) finish
- lamps adjustment in the optical system
- very high luminous intensity with maximum use of the light obtained from the 2 parabolic reflectors with axial mounted MSR/MSD 575W lamps

Beam Dispersion Devices

- variable size rectangular beam
- 4 different interchangeable diffusion filters give different beam angles: 2 x symmetrical (med & wide diffusion), 1 x horizontal and 1 x vertical diffusion

Dimmer

- built-in mechanical electronically controlled dimmer for complete adjustment of light output from 0 to 100%
- 3 different DMX curve reactions

Colour

- infinite colour output via CMY colour mixing system
- consistent colour reproduction due to unique dichroic filter system
- 3 different DMX curve reactions

Automatic functions

- two internal colour changing crossfade programs with user definable variable rate
- the two programs vary the number of colours output: the first produces saturated colours, whilst the second generates fades through all shades of colour available
- multiple units can be linked and synchronised (master & slave)

- Panorama fixtures operating as slaves are able to determine their own individual speed when performing a colour changing crossfade being initiated by a master unit.

Hardware device

- DMX signal reception indicator and characteristic feature display
- control via DMX 512 standard signal via 3 pin XLR. Signal connectors IP 67 protection rated.
- built-in electro-magnetic ignitors and PFC (power factor corrector)
- ventilation regulated by an internal timer (activated depending on lamp status)
- micro-step driven stepper motors
- 4 menu/function buttons for selecting the operation mode
- led display
- over temperature protection

Software devices

- digital numeric addressing of the projector via digital multifunction display
- on/off display
- indication of the lamp and the fixture working life
- display can be inverted
- electronic motor adjustment
- lamp on/off via DMX signal with ability to disable
- built-in features test facility

Patents
